

Product Data Sheet

Mobilarma 379 Soft Film Hot Dipping Rust Preventives

Product Description

Mobilarma 379 is a hot dip adhesive rust preventive for long term indoor and covered outdoor protection.

It is a light coloured high quality commercial petrolatum that is free from all acidic materials and relatively odourless.

Benefits

Mobilarma 379 offers the following benefits:

- Resistant to water washing and is suitable for use in humid atmosphere
- Protects components roughly handled or subjected motion
- The oily film is self sealing after fracture or damage

Applications

Mobilarma 379 is recommended for electrical insulating applications such as battery terminal corrosion prevention, and is a preservative for idle machinery etc.

It is applied in the molten state by dip or brush to provide indoor protection for at least six months and covered outdoor protection for at least three months. Removal can be by rinsing or wiping with kerosene, petroleum solvent or caustic materials. One kilogramme will cover approximately 25 square metres surface area.

Note:

Do not heat Mobilarma 379 above 80°C or its odourless characteristics will be impaired.

Health and Safety

Based on available toxicological information, it has been determined that this product poses no significant health risk when used and handled properly.

Details on handling, as well as health and safety information, can be found in the Material Safety Data Bulletin which can be obtained through Mobil Oil Company Ltd., by telephoning 01372 22 2000.

Typical physical characteristics are given in the table. These are intended as a guide to industry and are not necessarily manufacturing or marketing specifications.

Product Characteristics

Mobilarma 379

Film Type	Greasy
Unworked Penetration IP 179	155/175
Method of Application	Hot Dip
Melting Point °C IP 133	56/59
Flash Point, °C PMCC min.	176
Colour - ASTM	2.0
Relative Density 15/4 °C	0.885
Oil Viscosity, cSt at 100°C	12.0
